CURRENT SITUATION AND ITS EFFECTS

As a local health jurisdiction, the City of Berkeley provides a broad range of public health program services to the community, with the goals of addressing health inequities, promoting healthy environments and behaviors, protecting residents from disease, and preventing illness, disability, and premature death. The total additional anticipated revenue from these state grants is \$1,902,134 in FY 2021.

BACKGROUND

The City of Berkeley receives funding from many sources annually to conduct efforts towards improving the health of the community. As a local health jurisdiction, the City is entitled to specific State funding to meet core public health objectives. The Division is committed to providing essential services to the community to prevent the spread of disease and to promote healthy environments.

The State establishes funding caps for the CHDP/EPSTD/HPCFC and MCAH programs, with actual revenue determined by City matching funds and service delivery. Revenue projections are based on recent year actual revenues in these programs, service-delivery staffing, eligible client populations, and available matching funds. These projections will enable the Department to keep expenditures within actual revenues, by budgeting expenditures to realistic revenue projections.

Each grant serves a specific purpose in the Department's work towards improving the health of our community:

1. Child Health and Disability Prevention (CHDP) Program, which includes the Early Periodic Screening, Diagnosis, and Treatment (EPSTD) Program and the Health Care Program for Children in Foster Care (HPCFC), ensures access to complete health assessments for the early detection and prevention of disease and disabilities for low-income children and youth including children in the foster care system.
2. Maternal, Child and Adolescent Health (MCAH) Program develops and implements systems that protect and improve the health of women of reproductive age, infants, children, adolescents and their families and works to reduce the morbidity and mortality of pregnant African American women and their infants. The MCAH program includes Berkeley's Black Infant Health program, which provides groups and other supports to pregnant and post-partum mothers and their infants.
3. Tobacco Trust Fund works to reduce death and disease caused by tobacco use and exposure to second hand smoke.

4. Immunization Program provides immunization services to protect the community from serious illness and complications of vaccine-preventable diseases.
5. Public Health Emergency Preparedness/Pandemic Flu/CRI Program works to promote and protect the health of community and the environment by developing up-to-date medical/health emergency plans, sustaining state and regional disease control, and by coordinating emergency response efforts with hospitals and healthcare partners.
6. Public Health Emergency Preparedness Program COVID-19 Crisis Response Program supports the City's greatest Public Health response needs to prevent, prepare for, and respond to COVID-19.
7. Infectious Disease Prevention and Control supports the prevention and control of infectious diseases such as COVID-19.

ENVIRONMENTAL SUSTAINABILITY

There are no identifiable environmental effects or opportunities associated with the subject of this report.

RATIONALE FOR RECOMMENDATION

These funds support vital services related to our mandates as a public health jurisdiction and local initiatives designed to address health inequities in Berkeley and improve the health of Berkeley residents. These non-competitive grants support the Department's mission and provide the City with funding to continue working to protect and improve the health of the community.

ALTERNATIVE ACTIONS CONSIDERED

This funding is essential for the Public Health Division's mission and goals. The Public Health Division assesses each funding source to ensure that it supports the City's mission and goals. The alternative action of not seeking any of these funding sources would result in a significant reduction in public health services to the community.
