Each Subcommittee Work on a parallel track

First create an introduction including our experience as a Task force. Note weaknesses and strengths of this process.

1. Create a report which reviews recommendations by NICJR with feedback as to which can be supported.
2. Which recommendations can be supported but have major weaknesses. Write what the weaknesses are and how the recommended project can be strengthened.
3. Decide which NICJR recommendations cannot be supported at all and the reasons why and defend your subcommittee position. Offer alternatives if appropriate.
4. Create your subcommittees alternative recommendations
5. Or recommend new initiatives.
